

I do not understand the complete details, but what I know we need net neutrality. Everyone can use the internet fairly, and pretty much go on any site provided. If it stops, we would have to pay for all of it. A lot of families, including myself, would not be able to afford it. That is highly wrong because America is suppose to be the land of the free, not the land of limited access. Please if the FCC hears us out, please don't cut it off. I beg of you as a citizen of the USA.
